

Design Project

Creating a website

- Specifications:
- Using weebly.com (or similar website hosting site) you will create a website devoted to informing the public on a topic/subject you enjoy
- Website must contain:
 - A homepage
 - 3 additional tabs
 - Bibliography (references for images/videos/information)
 - Blog section with at least 5 posts
 - Must include 2 different types of multimedia (i.e. pictures, video, links to YouTube, etc...)
- Create Design folder (investigate, design, plan, create, and evaluate)

Investigate

- Specifications:
 - What are you suppose to do for this project?
 - What is the problem?
 - How will you solve this problem?
- Design brief
 - 3 potential ideas:
 - Describe each idea (roughly a paragraph) including pros/cons

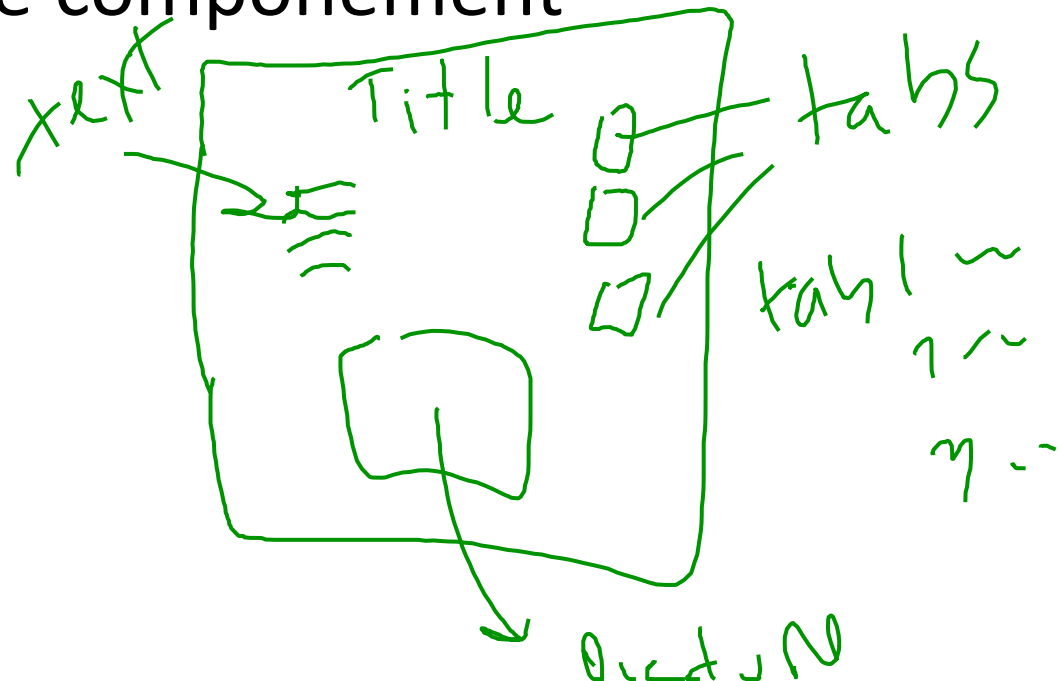

After brainstorming 3 ideas – pick one

In one paragraph explain why you chose this idea over the other two.

- Research
- Sources of information pertaining to accomplishing your task (i.e. other websites, tutorials, books, etc...)

Design

- Create a layout of your website's potential design
- Label any distinctive component

Plan

- Procedures you took to create your website
- Timeline of project

Create

- Include link to website
- Screen captures of each page

Evaluate

- Reflection
- Self evaluation

- Should be around one page in length

- Emphasize what you learned throughout the project. Complications or roadblocks. Which IB learner profile(s) have you touched upon.
